VOLUME 13 • 1970

I. BIBLIOGRAPHY

II. AUTHOR INDEX

III. DEPARTMENT INDEX

Entries in this index are for the technical papers, reports, and articles that appear under the heading "contributions" on the contents pages of the 12 issues of the year. Algorithms are indexed separately; the "Index by Subject to Algorithms, 1970" is on page 751 of this issue.

The KEY to the year and volume number (7013), the issue number (which is also the number of the month), and the page number is given before each entry.

The BIBLIOGRAPHY is in sequence, and each entry gives the title and the name of the author, or the names of multiple authors.

The AUTHOR INDEX is an alphabetized list of authors. If there is more than one author, each author is listed separately in alphabetical order; therefore in this section, a single entry would not include co-authors' names.

In the DEPARTMENT INDEX the editorial departments of *Communications* are given in alphabetical order, and the articles published by each department are listed in sequence.
